

Houben-Weyl Volume E 10: Table of Contents

Volume E 10a

Introduction

1. History (*Tatlow*)
2. Nomenclature (*Banks*)
3. Physical and Physicochemical Properties (*Groß, Rüdiger*)
- 4a. Elemental Analysis (*Perry*)
- 4b. Structure Determination (*Hammond*)
5. Toxicity (*Ulm*)
6. Applications (*Powell*)

A. Fluorinating Agents

- a. List of Agents (*Miethchen*)
 1. Introduction of Fluorine with Anhydrous Hydrogen Fluoride, Aqueous Solutions of Hydrogen Fluoride and HF-Base Complexes (*Miethchen, Peters*)
 2. Introduction of Fluorine with Elemental Fluorine (*Christe, Watanabe/Tojo, Rozen, Lagow, Adcock, Meshri/Hage*)
 3. Introduction of Fluorine with Noble Gas Fluorides (*Yu. L. Yagupolskii*)
 4. Introduction of Fluorine by Halogen Fluorides (*L. M. Yagupolskii*)
 5. Introduction of Fluorine with Perchloryl Fluoride (FCLO₃) (*Zupan*)
 6. Introduction of Fluorine with Agents Containing O-F Bonds (*Zupan*)
 7. Electrochemical Introduction of Fluorine (*Pohmer/Bulan*)
 8. Introduction of Fluorine Using Sulfur Tetrafluoride and Analogs (*Dmowski*)
 9. Introduction of Fluorine by N-F Compounds (*Furin*)
 10. Introduction of Fluorine with Phosphorus Pentafluoride, HPF₆, and Fluorophenyl-λ⁵-phosphanes (Ph_nPF_{5-n}, n = 1–3) (*L. M. Yagupolskii*)
 11. Introduction of Fluorine with Arsenic(III) Fluoride (AsF₃) (*L. M. Yagupolskii*)
 12. Introduction of Fluorine Using Antimony and Vanadium Fluorides (*L. M. Yagupolskii*)
 13. Introduction of Fluorine by C-F Reagents (*Rock*)
 14. Introduction of Fluorine with Alkali Metal Fluorides, Including Ammonium Fluoride and Tetraalkylammonium Fluorides (Including Special Methods of Fluorinations, e.g., Phase Transfer Catalysis, Activation by Crown Ethers, Reagents Bound to Polymers) (*Subramanian/Siegemund*)

15. Introduction of Fluorine with Magnesium, Calcium, and Barium Fluoride (*Subramanian/Siegemund*)
16. Introduction of Fluorine with Boron Trifluoride and Tetrafluoroboric Acid Complexes and Salts of Tetrafluoroboric Acid (*Stölting*)
17. Introduction of Fluorine with Aluminum Trifluoride and Complex Aluminum Fluorides (e.g., Na₃AlF₆) (*Stölting*)
18. Fluorination with Thallium(I) Fluoride and Organo-Substituted Thallium(I) Fluorides (*Stölting*)
19. Introduction of Fluorine with Silicon Tetrafluoride and Salts of Fluorosilicic Acid (*Kremlev*)
20. Introduction of Fluorine with Lead(II) Fluoride and Organolead Fluorides (*Kremlev*)
21. Introduction of Fluorine with Copper(I) Fluoride (*Kremlev*)
22. Introduction of Fluorine with Silver(I) Fluoride (*Kremlev*)
23. Introduction of Fluorine with Zinc(II) Fluoride (*Kremlev*)
24. Introduction of Fluorine with Mercury Fluorides (*Kremlev*)
25. Introduction of Fluorine with High-Valency Oxidizing Metal Fluorides (*Burdon*)
26. Introduction of Fluorine via Diazonium Compounds (Fluorodediazoniatio) (*Langlois*)

Volumes E 10b/1 and E 10b/2

B. Synthesis of Fluorinated Compounds

1. By Introduction of Fluorine with Preservation of the Carbon Skeleton (*Rock, Böhm, Schmierer, Barcina/Cecero, Wolfrum*)
2. Preparation of Fluorinated Compounds by Derivatization of Other Fluorinated Compounds (*Furin, Welch, Burton/Morken, Wakselman, Rock/Bonnet-Delpon, Subramanian/Siegemund, Pietruska, Stölting, Lui/Fischer-Lui*)
3. By Oxidation Reactions (*Paleta*)
4. Preparation of Unsaturated Organo-Fluorine Compounds by Intramolecular Dehydrohalogenation and Dehalogenation Reactions (*Il'Chenko, Kvičala/Paleta*)
5. By Isomerization Reactions (*Paleta/Richmond*)
6. By Disproportionation Reactions (*Rudolph/Rieland*)

C. Transformations of Fluorinated Compounds

1. Bond Strengths and Reactivity of Fluorine in Organo-Fluorine Compounds (*Welch*)
2. Replacement of Fluorine by Hydrogen (*Paleta*)
3. Loss of Fluorine To Form C=C Bonds (*Peters/Miethchen*)
4. Replacement of Fluorine To Form C-O Bonds (*Ya/Il'Chenko*)
5. Elimination of Fluorine To Form C-S Bonds (*St. Rüdiger*)
6. Elimination of Fluorine To Form C-N Bonds (*Podlech*)

Bibliography (*Welch*)

Volume E 10c/1 and E 10c/2

Index of Methods for the Synthesis and Transformations of Organo-Fluorine Compounds
